

## Chapter 11

## Demographics, Enrollments, and Degrees of Students in Public Two- and Four-Year Institutions

This chapter is a collection of enrolled student statistics for public two- and four-year institutions. It provides the most recent fall term (2000) data by students' demographic, enrollment, and degree characteristics. The objective is to describe public two- and four-year institution students from a statewide perspective, as well as by individual four-year universities/college and branch campuses. Data are displayed separately for main and branch campuses where appropriate.

### Demographic Characteristics

Tables 41 through 65 show students by gender and average age, resident/non-resident, Race and Hispanic Origin, and physical disability. Selected percentage calculations are given. The information on residency also groups students by class levels (i.e., lower class, upper class, graduate, and professional). Race and Hispanic Origin data use the 1990 census definitions. The Mexican American and Other Hispanic categories are shown separately under the Hispanic category. Students using disabled student services are categorized by type of disability (e.g., auditory, mobility, visual, or other impairments).

### Enrollment Characteristics

Tables 66 through 70 provide information on students by credit hours enrolled, retention rates, and declared major area of study. For credit hours enrolled, data include part-time and full-time students by class levels. For retention rates, the tables show percentages as well as number of students who were enrolled the previous spring term and who continue their enrollment in the subsequent fall term for each student classification. For major area of study, declared major students are summarized into the Classification of Instruction Program (CIP) which is the category used by the National Center for Education Statistics (NECS). Note that there are a large number of undeclared/pre-major students, especially in lower classes. Table 71 shows FTE workload by course levels, by CIP disciplines, and by each four-year institution and branch campus.

### Degree Characteristics

Tables 72 and 73 contain history of degree completion since 1980-81 by level. Four-year public and private institutions and community college completions are included in Table 72. Percentages of degrees awarded to total fall term enrollment for public four-year institutions since 1980-81 are provided in Table 73.

## NOTES:

\* PCC – Private Career College

Students with "Not Indicated" ages are not included in the age averaging.

Program enrollments do not total due to concurrent enrollments among programs.

Inclusion of Private Career College enrollments began in 1997.

## NOTES:

A Resident is a student who domiciled in Washington according to the RCW 28B.15.012.

A Domestic Non-Resident is a student who did not domicile in WA according to the RCW 28B.15.012 or is not a foreign student.

A Foreign Non-Resident is a student who attended an institution on a F visa, or a Canadian with border crossing privilege.

CC+TC = Community and Technical Colleges.

WFT = Workforce Training Program

TW = Timber Worker Program.

PCC = Private Career Colleges. Assuming all students are WA residents.

## NOTES:

1 Does not include HECB-Timber &amp; Salmon Impacted Prog.

2 Total Spring Term enrollment.

3 Spring Term Enrollees who continued enrollment in the following Fall Term.

4 Percent of Spring Term enrollees retained in the subsequent Fall Term.

5 For WSU Spokane, the greater number of Fall Term student retained from the previous Spring was due to relocating activities of continuing students within the school system. For other schools, it was caused by class adjustments due primarily to late approved transfer hours.
